Subject index

Alga,
bioaccumulation and voltammetric behaviour of gold at ———-containing carbon paste electrodes (Gardea-Torresdey et al.) 197
Alkyl xanthates,
studies on the conductance behaviour of potassium ——— in propylene carbonate and sulfolane (Srivastava et al.) 71
Auger spectroscopy,
studies of adsorbed unsaturated alcohols at well-defined Pt (111) electrode surfaces by cyclic voltammetry assisted by vibrational spectroscopy (EELS) and ——— (Gui et al.) 169
Axial ligand effect,
voltammetry of some novel Fe(III) complexes with tetradentate ONNO ligands. The ——— (Jovanović, Bjelica) 345

Bioaccumulation,
——— and voltammetric behavior of gold at alga-containing carbon paste electrodes (Gardea-Torresdey et al.) 197
Bis(1,3-dionato)copper(II) chelates,
electrochemical behaviour of ——— on mercury and carbon fibre electrodes (Tsiamis et al.) 109

Cadmium,
potential oscillations during the electrocrystallization of ——— from alkaline solutions under galvanostatic conditions (Kaneko et al.) 371
Cadmium sulfide,
mechanism for the electrodeposition of CdS using triphenylstibine sulfide (Preusser, Cocivera) 139
Carbon,
bioaccumulation and voltammetric behaviour of gold at alga-containing ——— paste electrodes (Gardea-Torresdey et al.) 197
Electrochemical behaviour of bis(1,3-dionato)copper(II) chelates on mercury and ——— fibre electrodes (Tsiamis et al.) 109
Carbon monoxide,
comparative study of CO adsorbed on Pt, Pd, Au and Ag electrodes in neutral solution by IR reflection absorption spectroscopy (Ikezawa et al.) 395
Kinetics of ——— adsorption on a rough rhodium electrode (Czerwiński) 189
Chlorine,
effect of cyclohexene on the mechanism of the ——— evolution reaction in nitromethane (Visy, Novák) 91
Chronopotentiometry,
——— at the DME with a current–time perturbation of the form $I_0(t_1 + t)^w$, t_1 being a preceding blank period (Molina et al.) 11
Conductivity,
effect of the temperature of synthesis on the ——— and electrochemical behaviour of polyaniline (Gholamian, Contractor) 291
Copper,
electrochemical behaviour of bis(1,3-dionato)copper(II) chelates on mercury and carbon fibre electrodes (Tsiamis et al.) 109
Conductometry,
conductometric incremental methods (Moroń et al.) 237
Current–time perturbation,
chronopotentiometry at the DME with a ——— of the form $I_0(t_1 + t)^w$, t_1 being a preceding blank period (Molina et al.) 11
Cyclodextrins,
adsorption of α-, β- and γ-——— on mercury electrodes from 1 *M* $NaClO_4$ and 0.5 *M* Na_2SO_4 aqueous solutions (Jaworski et al.) 425
Cyclohexene,
effect of ——— on the mechanism of the chlorine evolution reaction in nitromethane (Visy, Novák) 91

2,6-Dibromonaphthalene,
2,6-polynaphthylene films from cathodic coupling of an organonickel(II) complex of ——— (Tomat et al.) 215
2,5-Dihydroxythiophenol,
surface chelation of ——— at polycrystalline iridium electrodes (Bothwell et al.) 453
Dimethylsulphoxide,
electrochemical study of the mercury/lithium perchlorate interface in ——— + propylene carbonate mixtures at 298 K (Pillai et al.) 151
1,2-Dithiole-3-thiones,
electrochemical study of the reductive metabolism pathway of ——— (Largeron et al.) 99
Dinuclear molybdenum(V) complexes,
electrochemical studies of ——— with EDTA in aprotic solvents (Unoura et al.) 335
DME,
chronopotentiometry at the ——— with a current–time perturbation of the form $I_0(t_1 + t)^w$, t_1 being a preceding blank period (Molina et al.) 11

EDTA,
electrochemical studies of dinuclear molybdenum(V) complexes with ——— in aprotic solvents (Unoura et al.) 335
Electrocrystallization,
potential oscillations during the ——— of cadmium from alkaline solutions under galvanostatic conditions (Kaneko et al.) 371
Electron,
standard potential and chemical solvation energy of an ——— in ethylenediamine (Harima) 53
Electron transfer,
analysis of solvent effects on the kinetics of simple heterogeneous ——— reactions (Fawcett, Foss, Jr.) 221
Enzyme,
——— electrocatalysis at organic salt electrodes (Hill et al.) 125
ESR–electrochemical experiments,
a newly designed variable temperature stationary and flow-through cell for in-situ ——— in solvents having either low or high dielectric constants (Bagchi et al.) 259
Ethylenediamine,
standard potential and chemical solvation energy of an electron in ——— (Harima) 53

Flow-through cell,
a newly designed variable temperature stationary and ——— for in-situ ESR–electrochemical experiments in solvents having either low or high dielectric constants (Bagchi et al.) 259

Generalized surface layer,
alternative physical basis of the ——— (GSL) equation. Consequences on the analysis of adsorption data (Schuhmann) 1
Glassy carbon,
aqueous electrochemistry of tellurium at ——— and gold. A combined voltammetry–oscillating quartz crystal microgravimetric study (Mori et al.) 441
Study of the deposition of iron on mercury and ——— electrodes (Winkler et al.) 303
Gold,
aqueous electrochemistry of tellurium at glassy carbon and ———. A combined voltammetry–oscillating quartz crystal microgravimetric study (Mori et al.) 441
Bioaccumulation and voltammetric behavior of ——— at alga-containing carbon paste electrodes (Gardea-Torresdey et al.) 197
Comparative study of CO adsorbed on Pt, Pd, Au and Ag electrodes in neutral solution by IR reflection absorption spectroscopy (Ikezawa et al.) 395

Hydrogen,
photo- and electrooxidation of water-soluble magnesium *meso*-tetraanilinporphyrin. Part 1. Photoinduced reduction of water to ——— (Szulbiński, Strojek) 323

Incremental methods,
conductometric ——— (Moroń et al.) 237
Indium(III)–hexacyanoferrate,
——— as a novel polynuclear mixed-valent inorganic material for preparation of thin zeolitic films on conducting substrates (Kulesza, Faszynska) 461
Iodine,
study of the ion transfer of ——— and its complexes across the water/nitrobenzene interface (Pang, Wang) 245
Ion transfer,
study of the ——— of iodine and its complexes across the water/nitrobenzene interface (Pang, Wang) 245

Iridium,
surface chelation of 2,5-dihydroxythiophenol at polycrystalline ——— electrodes (Bothwell et al.) 453
Iron,
study of the deposition of ——— on mercury and glassy carbon electrodes (Winkler et al.) 303
Voltammetry of some novel Fe(III) complexes with tetradentate ONNO ligands. The axial ligand effect (Jovanović, Bjelica) 345
Iron(III) oxide,
characterization of Ti-doped α-Fe_2O_3 electrodes by impedance measurements (McAlpine, Fredlein) 61
Photoelectrochemistry of niobium doped α-Fe_2O_3 (Sanchez et al.) 269
Iron thiocyanate,
determination of trace nitrite by catalytic polarography in ferrous ——— medium (Zhao, Cai) 361
IR reflection absorption spectroscopy,
comparative study of CO adsorbed on Pt, Pd, Au and Ag electrodes in neutral solution by ——— (Ikezawa et al.) 395
Thin-layer flow cell for in-situ infrared reflection–absorption spectroscopic measurements of the electrode/electrolyte interphase (Bockris, Yang) 209

Lithium perchlorate,
electrochemical study of the mercury/——— interface in dimethylsulphoxide + propylene carbonate mixtures at 298 K (Pillai et al.) 151

Magnesium *meso*-tetraanilinporphyrin,
photo- and electrooxidation of water-soluble ———. Part 1. Photoinduced reduction of water to hydrogen (Szulbiński, Strojek) 323
Mercury,
adsorption of α-, β- and γ-cyclodextrins on ——— electrodes from 1 *M* $NaClO_4$ and 0.5 *M* Na_2SO_4 aqueous solutions (Jaworski et al.) 425
Adsorption of stereoisomers at a Hg electrode. The effect of concentration and temperature (Silva, Rodrigues) 403
Electrochemical behaviour of bis(1,3-dionato)copper(II) chelates on ——— and carbon fibre electrodes (Tsiamis et al.) 109
Electrochemical study of the ———/lithium perchlorate interface in dimethylsulphoxide + propylene carbonate mixtures at 298 K (Pillai et al.) 151
Study of the deposition of iron on ——— and glassy carbon electrodes (Winkler et al.) 303
Metabolism,
electrochemical study of the reductive ——— pathway of 1,2-dithiole-3-thiones (Largeron et al.) 99
Microelectrodes,
——— in the examination of anodic and cathodic limit reactions of an ambient temperature molten salt (Carlin, Osteryoung) 81
Microgravimetry,
aqueous electrochemistry of tellurium at glassy carbon and gold. A combined voltammetry–oscillating quartz crystal microgravimetric study (Mori et al.) 441
Molten electrolyte,
thermal analysis of electrochemical reactions. Part II. The non-stationary temperature wave method — a method for the determination of Peltier heats at the electrode/——— interface (Kuz'minskii, Andriiko) 39
Molten salt,
microelectrodes in the examination of anodic and cathodic limit reactions of an ambient temperature ——— (Carlin, Osteryoung) 81
Molybdenum,
electrochemical studies of dinuclear ——— (V) complexes with EDTA in aprotic solvents (Unoura et al.) 335

Nickel,
2,6-polynaphthylene films from cathodic coupling of an organonickel(II) complex of 2,6-dibromonaphthalene (Tomat et al.) 215
Nicotinamide adenine dinucleotide,
reduction of NAD^+ and $NADP^+$ and reductive cleavage of NADH and NADPH yielding $NAD^\cdot$ and $NADP^\cdot$ (Studničková et al.) 383
Niobium,
photoelectrochemistry of ——— doped α-Fe_2O_3 (Sanchez et al.) 269
Nitrite,
determination of trace ——— by catalytic polarography in ferrous iron thiocyanate medium (Zhao, Cai) 361
Nitrobenzene,
study of the ion transfer of iodine and its complexes across the water/ ——— interface (Pang, Wang) 245

Nitromethane,
effect of cyclohexene on the mechanism of the evolution reaction in ——— (Visy, Novák) 91
Non-stationary temperature wave,
thermal analysis of electrochemical reactions. Part II. The ——— method — a method for the determination of Peltier heats at the electrode/molten electrolyte interface (Kuz'minskii, Andriiko) 39

Organic salt,
enzyme electrocatalysis at ——— electrodes (Hill et al.) 125

Palladium,
comparative study of CO adsorbed on Pt, Pd, Au and Ag electrodes in neutral solution by IR reflection absorption spectroscopy (Ikezawa et al.) 395
Peltier heats,
thermal analysis of electrochemical reactions. Part I. Kinetic method of determining ——— (Kuz'minskii, Gorodyskii) 21
Thermal analysis of electrochemical reactions. Part II. The non-stationary temperature wave method — a method for the determination of ——— at the electrode/molten electrolyte interface (Kuz'minskii, Andriiko) 39
Platinum,
comparative study of CO adsorbed on Pt, Pd, Au and Ag electrodes in neutral solution by IR reflection absorption spectroscopy (Ikezawa et al.) 395
Studies of adsorbed unsaturated alcohols at well-defined Pt (111) electrode surfaces by cyclic voltammetry assisted by vibrational spectroscopy (EELS) and Auger spectroscopy (Gui et al.) 169
Polyaniline,
effect of the temperature of synthesis on the conductivity and electrochemical behaviour of ——— (Gholamian, Contractor) 291
2,6-Polynaphthylene,
——— films from cathodic coupling of an organonickel(II) complex of 2,6-dibromonaphthalene (Tomat et al.) 215
Propylene carbonate,
electrochemical study of the mercury/lithium perchlorate interface in dimethylsulphoxide + ——— mixtures at 298 K (Pillai et al.) 151
Studies on the conductance behaviour of potassium alkyl xanthates in ——— and sulfolane (Srivastava et al.) 71

Rhodium,
kinetics of carbon monoxide adsorption on a rough ——— electrode (Czerwiński) 189

Silver,
comparative study of CO adsorbed on Pt, Pd, Au and Ag electrodes in neutral solution by IR reflection absorption spectroscopy (Ikezawa et al.) 395
Solvent effects,
analysis of ——— on the kinetics of simple heterogeneous electron transfer reactions (Fawcett, Foss, Jr.) 221
Stereoisomers,
adsorption of ——— at a Hg electrode. The effect of concentration and temperature (Silva, Rodrigues) 403
Sulfolane,
studies on the conductance behaviour of potassium alkyl xanthates in propylene carbonate and ——— (Srivastava et al.) 71

Tellurium,
aqueous electrochemistry of ——— at glassy carbon and gold. A combined voltammetry–oscillating quartz crystal microgravimetric study (Mori et al.) 441
Tetradentate ONNO ligands,
voltammetry of some novel Fe(III) complexes with ———. The axial ligand effect (Jovanović, Bjelica) 345
Thermal analysis,
——— of electrochemical reactions. Part II. The non-stationary temperature wave method — a method for the determination of Peltier heats at the electrode/molten electrolyte interface (Kuz'minskii, Andriiko) 39
——— of electrochemical reactions. Part I. Kinetic method of determining Peltier heats (Kuz'minskii, Gorodyskii) 21
Thin-layer flow cell,
a ——— for in-situ infrared reflection–absorption spectroscopic measurements of the electrode/electrolyte interphase (Bockris, Yang) 209
Titanium,
characterization of Ti-doped α-Fe_2O_3 electrodes by impedance measurements (McAlpine, Fredlein) 61

Triphenylstibine sulfide,
mechanism for the electrodeposition of CdS using ——— (Preusser, Cocivera) 139
Triphosphopyridine nucleotide,
reduction of NAD^+ and $NADP^+$ and reductive cleavage of NADH and NADPH yielding $NAD^\cdot$ and $NADP^\cdot$ (Studničková et al.) 383

Unsaturated alcohols,
studies of adsorbed ——— at well-defined Pt (111) electrode surfaces by cyclic voltammetry assisted by vibrational spectroscopy (EELS) and Auger spectroscopy (Gui et al.) 169

Vibrational spectroscopy,
studies of adsorbed unsaturated alcohols at well-defined Pt (111) electrode surfaces by cyclic voltammetry assisted by ——— (EELS) and Auger spectroscopy (Gui et al.) 169

Water,
photo- and electrooxidation of water-soluble magnesium *meso*-tetraanilinporphyrin. Part 1. Photoinduced reduction of ——— to hydrogen (Szulbiński, Strojek) 323

Zeolitic films,
Indium(III)–hexacyanoferrate as a novel polynuclear mixed-valent inorganic material for preparation of thin ——— (Kulesza, Faszynska) 461
